

The Tumors of the Pancreas

From the Histological Diagnosis to Personalized Therapy

It is with great pleasure and privilege to have been part of a conference for an important cause. The organization of the Conference was conducted by Prof. Roberta Di Pietro, Full Professorship of Histology, Università G. d'Annunzio di Chieti-Pescara, Department of Medicine and Ageing Sciences, Section of Biomorphology.

The honor to have had the opportunity of interpreting the speech presented by Prof. Maximilian Reichert MD, Director of the Department of Medicine of the University Hospital of Medicine, Monaco, Germany and Professorship for Translational Pancreatic Cancer Research, Department of Internal Medicine II, (Gastroenterology), TU Munich entitled: **“Dynamic cell fate decisions in pancreatic cancer and the tumor microenvironment”**.
